## LANGUAGES, FRAMEWORKS, & TECHNOLOGIES

---

HTML5 | CSS3 | JavaScript | Bootstrap | Tailwind | React.js | Express.js | Node.js | SQL | MongoDB | GraphQL

## PROJECTS

---

- Crafted and executed end-to-end development for a Construction Company and Portfolio website, both currently deployed, showcasing adeptness in web markup (HTML5 and CSS3) and client-side scripting (JavaScript).
- Conceptualized and executed a cocktail recipe web app, Cocktail Wizard, which streamlines drink recipe discovery by enabling users to search for cocktails using various methods. This project showcased proficiency in working with third-party/server-side APIs, demonstrated adaptability in addressing API limitations, and the ability to collaborate efficiently with another developer to meet a project deadline.
- In collaboration with four other developers, designed and developed Maintenance Manatee. A user-friendly full stack web app that simplifies vehicle maintenance tracking. Utilized technologies including Sequelize, MySQL2, and Express to efficiently manage maintenance data, demonstrating proficiency in creating intuitive and organized user interfaces.

## EDUCATION

---

### COURSES & CERTIFICATIONS

- |  |            |
